HIGH TECH TUCK!
The secret is criss-cross stitching on the inside panels

PURE JEANIUS: Tummy Tuck Jean by Not Your Daughter's Jeans has come up with an innovation that might rival the wheel in some circles. Patented criss-cross stitching on the inside of the front pockets creates a corset-like effect that holds in stomachs to make them look flatter—comfortably! With a slightly higher rise and soft, stretchy denim, the jeans claim to contour the hips too and make you look thinner all over. They may not be your daughter's jeans—but they might give you her figure.
