NIP/TUCK Without the Nip

Let's face it, jeans are a necessary staple to anyone's wardrobe, and the inability to find a flattering pair is frustrating. Finally a backlash to the "low rise" sensation has arrived on the market. For the majority of women who are not a size two, Not Your Daughter's Jeans Company presents Tummy Tuck Jeans. Tummy Tuck Jeans offer a patented criss-cross front panel that holds in the stomach, contours the hips and lifts the rear. The clincher: This patented design enables you to wear one size smaller!

As if that weren't enough, they are actually comfortable. It's no wonder these jeans have been flying off the shelves, and are now the fastest growing jeans company in America. Food Network Chef and personality Rachel Ray loves how they fit, saying, "Women who like to eat need Tummy Tuck Jeans!"

Available in a variety of wash and styles, anyone can find a pair to complement their personal taste. Now you can find a pair for yourself at Nordstrom's, Dillard's and over 1000 local retail stores nationwide. **V**
